NOW WITH
PROTECTION THAT LIVES ON
MICROBAN[®]
ANTIMICROBIAL PROTECTION

FROM THE MAKERS OF **ENVIROFILL**[®]

PREMIUM SYNTHETIC
TURF INFILL

KEEP YOUR BLADES
STANDING TALL

Emerald Fill Plus NOW WITH MICROBAN! A highly durable and rounded acrylic-coated sand. It's antimicrobial protection helps prevent the growth of bacteria, mold and mildew that can cause stains, odors, and product deterioration. It's great for all synthetic turf surfaces and non-toxic, making it a safe choice for children and pets.

Benefits:

- Inhibits Pet Urine Odor**
- Promotes Better Drainage**
- Easy Installation**
- Non-Toxic**
- Won't Absorb Moisture**

Ideal for putting greens, pets, lawns and playgrounds. Emerald Fill Plus is highly rounded, which allows for easy installation in dense turf. Because it is round, it resists compaction, keeping green speeds constant over time and is especially good for high traffic areas such as swings and slides.

"The product practically falls into the turf with minimal brushing and cuts down on labor costs compared to straight silica sand." - Mike H., Installer

KEEP YOUR PUTTING GREEN LOOKING ITS BEST

FILLED WITH RAW SAND

FILLED WITH EMERALD FILL PLUS

DIRECTIONS FOR USE:

30-50 is recommended for short pile, texturized putting green turf. Once the turf is secured to the base layer, disperse the necessary amount of infill needed, typically 2 to 4 pounds per square foot for low pile putting greens, and brush down into the turf fibers. Ensure proper and even distribution of infill by walking over the surface to double check your work. The top of the infill should rest approx. 1/16" below the tips of the blades for best results.

KEEP YOUR LAWN LOOKING ITS BEST

DIRECTIONS FOR USE:

For new and existing installations, brush up synthetic grass blades. Disperse 2 to 4 pounds of infill per square foot on top of the synthetic grass, then brush infill down into the fibers of the turf, ensuring proper and even distribution throughout the lawn/putting green. If necessary, water thoroughly and rebrush for best infill results.
