

# EMERALD FILL <sup>plus</sup>

FROM THE MAKERS OF ENVIROFILL®

## What Makes Emerald Fill Plus Turf Infill the Most Pet-Friendly Option?

### Synthetic Grass for Homeowners with Pets?

Artificial lawns continue to gain popularity in backyards across the country; they're drought-proof, low-maintenance, and now with USGreentech's innovations in turf infill manufacturing, they are non-toxic, allergen-free, and PET-FRIENDLY!

Every dog-loving family knows that while you love your cute and cuddly pets to bits, they all come with several less-than-lovable, stinky messes every day! You may be wondering if turf infill can stand up to the test of dog poo and provide a clean, safe, and bacteria-free environment in your backyard.

Well, the answer is a resounding YES! Thankfully, USGreentech offers the perfect turf infill that's specifically designed for homes with four-legged family members.

### Emerald Fill Plus: The Perfect Dog-friendly Turf Infill for Your Backyard

Emerald Fill Plus is non-toxic and completely reusable, with a natural and comfortable look and feel that you and your beloved dogs will both love. Best yet, it's infused with Microban® antimicrobial protection, so it works continuously to help inhibit the growth of bacteria, mold, and mildew that can cause odors in backyards well-traversed by dogs and other furry friends.

Here are the **top 3 reasons** Emerald Fill Plus couldn't be a better turf infill solution for your backyard's turf system:

#### #1 It's Safe for Everyone, Including Dogs and Kids

Emerald Fill Plus has been declared a non-toxic, non-hazardous material which makes it safe for dogs, cats, and people alike. In fact, it exceeds all of the safety standards set forth by the American Society for Testing and Materials, an international standard relating to the maximum level of hazardous metal in children's toys. So, don't sweat it if your dog accidentally ingests a few pieces. We know that you think of your dogs as furry children, so having an infill you can rely on for both performance and safety is crucial.

KEEP YOUR LAWN LOOKING ITS BEST

## #2 Stinky Smells Won't Linger

Emerald Fill Plus is the only turf infill on the market infused with Microban technology, providing anti-microbial protection and reducing ammonia odor urine up to 99%. Microban has been scientifically proven to disrupt the bacterial process that converts pet urine into ammonia odor.

Because Microban is infused during Emerald Fill Plus's proprietary coating process, it will never wear or wash off and will last throughout the entire life cycle of your turf infill, working 24/7 to keep your loved ones safe and your backyard smelling fresh during outside relaxation or adventure time!

Rest assured that with Emerald Fill Plus's turf infill, your beloved dog will go about his business without sending a smelly signal to your family, guests, or neighbors.

With Emerald Fill Plus, you're bound to smell the difference!

## #3 Huge Benefits, Little Maintenance

Zero watering, no strong odors from dog waste, and virtually no maintenance. Sound like a backyard oasis?

Emerald Fill Plus is made with allergen and toxin-free ingredients, so it's incredibly safe for enjoying all day, every day. Our infill was designed with a uniquely rounded shape to avoid compaction, promote better percolation rates, and ensure better drainage before and after clean up when compared to traditional infills.

### Your Artificial Turf and Dog Urine

For families with pets, the grass truly is greener with Emerald Fill Plus. Get the best, safest, and cleanest turf infill for your home landscape!

You know the (ahem) offensive smell that sticks in your nose when you're at a dog

park on a sunny day? That, my friends, is the result of urine. Unfortunately, dogs can't help the smell, they're dogs for goodness sake.

When dog urine comes into contact with artificial turf, the natural occurring microbes begin to break down the urine into three parts- two parts ammonia, one part carbon dioxide. Those three little components- those are the culprit of *that* smell.

Emerald Fill Plus, which is infused with **Microban®** Antimicrobial Technology helps to reduce the creation of ammonia by fighting against odor-causing bacteria, mold and mildew. This means, Emerald Fill Plus will help lawns not have that offensive smell that sticks in your nose! This is great news, people. This is a game changer.

Microban with Antimicrobial technology reduces ammonia odor that's caused by the breakdown of ammonia by up to 99%. Every household with a dog, every dog park, even homes with potty training toddlers- will benefit. The urine smell does not have to be a part of an artificial lawn system. It's a choice.
